

Measures of Central Tendency Analysis

Introduction

The dataset contains information on SSC percentage, HSC percentage, Degree percentage, Employability Test percentage, MBA percentage, and Salary. The measures of central tendency (Mean, Median, and Mode) were calculated to understand the distribution of the data.

Table: Mean, Median and Mode Values

	sl_no	ssc_p	hsc_p	degree_p	etest_p	mba_p	salary
Mean	108.0	67.303395	66.333163	66.370186	72.100558	62.278186	288655.405405
Median	108.0	67.0	65.0	66.0	71.0	62.0	265000.0
Mode	1	62.0	63.0	65.0	60.0	56.7	300000.0

Interpretation

Mean Analysis

The average SSC percentage is 67.30%, HSC percentage is 66.33%, Degree percentage is 66.37%, Employability Test percentage is 72.10%, and MBA percentage is 62.28%. The average salary offered to candidates is ₹288,655.41.

Median Analysis

The median SSC percentage is 67%, HSC percentage is 65%, Degree percentage is 66%, Employability Test percentage is 71%, and MBA percentage is 62%. The median salary is ₹265,000.

Mode Analysis

The most frequently occurring SSC percentage is 62%, HSC percentage is 63%, Degree percentage is 65%, Employability Test percentage is 60%, and MBA percentage is 56.7%. The most frequently occurring salary is ₹300,000.

Conclusion

The mean and median values of the academic percentages are relatively close, indicating a balanced distribution of student performance. Among all variables, the Employability Test percentage has the highest average score (72.10%). The most frequently occurring salary is ₹300,000, while the average salary is ₹288,655.41, showing some variation in salary packages among candidates.
