

Percentile Analysis

Introduction

Percentile analysis was performed to understand the distribution of SSC percentage, HSC percentage, Degree percentage, Employability Test percentage, MBA percentage, and Salary. The 25th percentile (Q1), 50th percentile (Q2/Median), 75th percentile (Q3), 99th percentile, and 100th percentile (Q4/Maximum Value) were calculated to examine the spread and variation of the data.

Table: Percentile Values

Percentile	SSC_P	HSC_P	Degree_P	Etest_P	MBA_P	Salary
Q1 (25%)	60.60	60.90	61.00	60.00	57.95	240,000
Q2 (50%)	67.00	65.00	66.00	71.00	62.00	265,000
Q3 (75%)	75.70	73.00	72.00	83.50	66.26	300,000
99%	87.00	91.86	83.86	97.00	76.11	-
Q4 (100%)	89.40	97.70	91.00	98.00	77.89	940,000

Interpretation

Q1 (25th Percentile)

At the 25th percentile, SSC percentage is 60.60%, HSC percentage is 60.90%, Degree percentage is 61.00%, Employability Test percentage is 60.00%, and MBA percentage is 57.95%. The salary at this percentile is ₹240,000. This indicates that 25% of the candidates scored below these values.

Q2 (50th Percentile)

At the 50th percentile, SSC percentage increases to 67.00%, HSC percentage to 65.00%, Degree percentage to 66.00%, Employability Test percentage to 71.00%, and MBA percentage to 62.00%. The salary increases to ₹265,000. Compared to Q1, there is a noticeable improvement in academic performance and salary levels, indicating better overall candidate performance.

Q3 (75th Percentile)

At the 75th percentile, SSC percentage reaches 75.70%, HSC percentage 73.00%, Degree percentage 72.00%, Employability Test percentage 83.50%, and MBA percentage 66.26%. The salary increases to ₹300,000. The increase from Q2 to Q3 shows that candidates in the upper quartile demonstrate stronger academic achievements and employability skills.

99th Percentile

At the 99th percentile, SSC percentage is 87.00%, HSC percentage is 91.86%, Degree percentage is 83.86%, Employability Test percentage is 97.00%, and MBA percentage is 76.11%. These values are substantially higher than those observed at Q3, indicating the presence of a small group of exceptionally high-performing candidates.

Q4 (100th Percentile)

At the 100th percentile, SSC percentage reaches 89.40%, HSC percentage 97.70%, Degree percentage 91.00%, Employability Test percentage 98.00%, and MBA percentage 77.89%. The maximum salary recorded is ₹940,000. The large increase in salary compared to the lower percentiles indicates that a few candidates received exceptionally high salary packages.

Conclusion

The percentile analysis reveals a steady increase in academic scores, employability test scores, and salary values from Q1 to Q4. The differences between the 25th, 50th, and 75th percentiles indicate gradual improvement in candidate performance. The sharp increase observed at the 99th and 100th percentiles suggests the presence of top-performing candidates and a few exceptionally high salary packages, resulting in greater variation at the upper end of the dataset.
